

Meal Tracker[®] Inventory

Includes Purchasing & Bidding

Developed with school food service needs in mind!

You don't have time for a complicated, hard-to-learn software. You also don't have an unlimited budget for technology.

We can help.

We've combined the best of all worlds: an easy to learn software that's economical, yet robust and versatile. And, it includes comprehensive Purchasing & Bidding tasks.

[Includes USDA Child Nutrition 8 \(CN8\) Database](#)

[Use as a stand-alone or in a networked environment.](#)

[Direct Link to Meal Tracker Menu Planning / Nutritional Analysis software module.](#)

[FIFO Costing](#)

Though any item may have stock at several prices, the FIFO accounting method ensures decrementation and costing of your inventory based on its actual value.

[Barcode Inventory Scanning](#)

Physical inventory can be easily captured via barcode scanning. The easy-to-use scanner reads both "case" units and "issue" units (a single can or package). Data is quickly uploaded to the software for adjusting inventory levels.

[Multi-Site Storeroom Requisition/Transfer](#)

Any site may requisition from the central warehouse, or from another site. You will love the handy "1 Step Transfer" option.

[Tracks Rebates by Vendor.](#)

[Usage History for All Stocked Items](#)

Purchasing & Bidding

Unlimited vendors for each item.

Purchase orders may be made by school or by central warehouse.

Export bid documents to Excel or other vendor-specific formats. The bid document includes item usage history.

Import bid information from each vendor's Excel document, saving you hours of data entry and potential mistakes.

Vendor management helps you maintain best prices for all vendors; for all items.

Auto-Receive option saves you time when receiving large orders.
